

A natural and circular process to create **unique, recycled textures**

PLADEC's natural finishes are a solution that provides two main benefits:

- true circularity that reduces environmental impact of ceramics
- a one-of-a-kind, natural, beautiful texture

These finishes are sourced from local manufacturers that work with these materials. We retrieve it, process it and create a plaster that is available under three forms: as a powder for application, a flat panel or a mosaic.

Manufactured from

Minerals

Recycled
ceramics

Soil

Available as a
mixing powder

Mix it with a resin, apply on a surface and wait
about 8 hours for the paste to dry.

Refinish at your taste for a different texture.
Use different tools for different effects.

Available as a **flat panel**

We provide panels with a 3mm texture already applied.

Choose from one of the 12 textures available and apply it on your project.

Standard size of 2400mm by 1200mm.

Available as a
mosaic

We create custom mosaics with a finish already applied

Some textures available at the end of the catalogue.

Our mosaics

A new world of finishes

We create unique mosaics to achieve unique projects.

The combination of tridimensional elements (ridges, tilts and frames) with the unique texture of terracota, minerals and others allows for a one-of-a-kind panel that stands out in the middle of any design.
